The Neurons of the First Optic Ganglion of the Bee (*Apis mellifera*) (Advances in Anatomy, Embryology and Cell Biology)

W.A. Ribí

The Neurons of the First Optic Ganglion of the Bee (*Apis mellifera*) (Advances in Anatomy, Embryology and Cell Biology) W.A. Ribí

The visual system of insects has attracted histologists for a long time. We have detailed histological studies of the visual systems of Diptera, Hymenoptera and Odonata dating from the last century: Leydig's (1864) study on optical ganglia of insects, Ciaccio's (1876) on the fine structure of the first ganglion in the mosquitos and Hickson's (1885) giving for the first time an exact description of the three optical ganglia of *Musca*. From 1896 several papers appeared using neuro histological methods, mainly Golgi techniques and methylene blue staining. In 1896 Kenyon published his work on the bee-brain and in 1897 described the relationships of neurons in the optic ganglia with a modified Golgi method. Another work, by Jonescu (1909), should be mentioned: "Vergleichende Untersuchungen am Gehirn der Honigbiene". In the same year Cajal's findings on the optic ganglia of the fly were published; then in 1915 Cajal and Sanchez wrote a definitive monograph on the neural elements and their connections in the same animal that remained the main reference in this field for decades. In both works Golgi techniques were used. Since then there have been only a few new publications on the subject: (Gribakin, 1967; Perrelet and Baumann, 1969 a, b; Perrelet, 1970; Varela and Porter, 1969; Skrzipek and Skrzipek, 1971, 1973; Grundler, 1972; Snyder, Menzel and Laughlin, 1973). They deal mainly with the receptors of the retina.

From reader reviews:

Odis Hillyard:

Hey guys, do you want to find a new book you just read? Maybe the book with the name *The Neurons of the First Optic Ganglion of the Bee (Apis mellifera) (Advances in Anatomy, Embryology and Cell Biology)* suitable to you? Typically the book was written by a well-known writer in this era. The book titled *The Neurons of the First Optic Ganglion of the Bee (Apis mellifera) (Advances in Anatomy, Embryology and Cell Biology)* is the one of several books that will everyone read now. This specific book was inspired lots of people in the world. When you read this guide you will enter the new dimension that you ever know prior to. The author explained their strategy in the simple way, therefore all of people can easily to recognise the core of this e-book. This book will give you a great deal of information about this world now. So you can see the represented of the world in this particular book.

Dennis Simpson:

The Neurons of the First Optic Ganglion of the Bee (Apis mellifera) (Advances in Anatomy, Embryology and Cell Biology) can be one of your nice books that are good idea. We recommend that straight away because this e-book has good vocabulary that can increase your knowledge in vocabulary, easy to understand, bit entertaining but nevertheless delivering the information. The copy writer giving his/her effort to put every word into enjoyment arrangement in writing *The Neurons of the First Optic Ganglion of the Bee (Apis mellifera) (Advances in Anatomy, Embryology and Cell Biology)* nevertheless doesn't forget the main level, giving the reader the hottest as well as based confirm resource facts that maybe you can be among it. This great information can draw you into fresh stage of crucial considering.

Gayle Meek:

Your reading 6th sense will not betray you, why because this *The Neurons of the First Optic Ganglion of the Bee (Apis mellifera) (Advances in Anatomy, Embryology and Cell Biology)* reserve written by well-known writer we are excited for well how to make book that could be understand by anyone who have read the book. Written with good manner for you, leaking every ideas and writing skill only for eliminate your current hunger then you still skepticism *The Neurons of the First Optic Ganglion of the Bee (Apis mellifera) (Advances in Anatomy, Embryology and Cell Biology)* as good book not merely by the cover but also from the content. This is one guide that can break don't evaluate book by its deal with, so do you still needing a different sixth sense to pick this kind of!? Oh come on your looking at sixth sense already said so why you have to listening to another sixth sense.

Nancy Chinn:

You may get this *The Neurons of the First Optic Ganglion of the Bee (Apis mellifera) (Advances in Anatomy, Embryology and Cell Biology)* by visit the bookstore or Mall. Merely viewing or reviewing it can to be your solve difficulty if you get difficulties for the knowledge. Kinds of this book are various. Not only

by simply written or printed but can you enjoy this book by means of e-book. In the modern era similar to now, you just looking by your mobile phone and searching what your problem. Right now, choose your own personal ways to get more information about your e-book. It is most important to arrange yourself to make your knowledge are still up-date. Let's try to choose proper ways for you.
