Laravel 5 Essentials

Martin Bean

Laravel 5 Essentials Martin Bean
Explore the fundamentals of Laravel, one of the most expressive and robust PHP frameworks available

About This Book

- Create a dynamic web application that can read and write data to a database
- Improve your PHP skills and develop a new outlook on solving programming issues
- A step-by-step guide that covers the different steps involved in creating a complete Laravel application in an easy-to-understand manner

Who This Book Is For

This book is intended for PHP web developers who have an interest in Laravel and who know the basics of the framework in theory, but don't really know how to use it in practice. No experience of using frameworks is required, but it is assumed you are at least familiar with building dynamic websites in PHP already.

What You Will Learn

- Set up a development environment for working with Laravel apps
- Create a working Laravel application from start to finish
- Interact with data and discover Eloquent, Laravel's own ORM
- Create and run migrations and seeds
- Simplify command-line tasks by building Artisan commands
- Protect your app by securing it from common security vulnerabilities
- Perform end-to-end testing after learning the basics of testing in Laravel
- Learn about Laravel's other features including service providers, packages, queue workers, and helpers for working with strings and arrays

In Detail

Laravel has established itself as one of the most popular PHP frameworks over the past couple of years. Its popularity comes due to its ease of use, expressive syntax, and the number of components it has, allowing you to achieve practically any task in a modern PHP application.

If you've not had the opportunity to dive into Laravel yet, then this book will be the perfect companion, as it covers the fundamentals Laravel is built on in a thorough yet easy-to-follow manner. To make this book your best learning source, we have covered integral topics such as preparing an environment for working with Laravel applications, creating your first Laravel application from start to finish, a tour of Laravel's ORM Eloquent, and more advanced topics such as testing, user authentication, and security. Being one of the most interesting features in Laravel, we also cover an overview of Artisan, including descriptions of some of its tasks. Post this, we talk about testing and security. By the end of this book, you will be able to create robust PHP websites and web applications quickly and efficiently.

From reader reviews:

Frank Cockerham:

People live in this new day of lifestyle always aim to and must have the free time or they will get great deal of stress from both way of life and work. So , once we ask do people have extra time, we will say absolutely without a doubt. People is human not really a huge robot. Then we request again, what kind of activity are you experiencing when the spare time coming to a person of course your answer will unlimited right. Then do you ever try this one, reading guides. It can be your alternative throughout spending your spare time, often the book you have read is Laravel 5 Essentials.

Michelle Bachman:

Your reading sixth sense will not betray an individual, why because this Laravel 5 Essentials e-book written by well-known writer whose to say well how to make book which might be understand by anyone who read the book. Written throughout good manner for you, dripping every ideas and publishing skill only for eliminate your own hunger then you still hesitation Laravel 5 Essentials as good book but not only by the cover but also by the content. This is one publication that can break don't determine book by its handle, so do you still needing one more sixth sense to pick this specific!? Oh come on your studying sixth sense already told you so why you have to listening to yet another sixth sense.

Betty Bowers:

That book can make you to feel relax. This specific book Laravel 5 Essentials was colorful and of course has pictures around. As we know that book Laravel 5 Essentials has many kinds or variety. Start from kids until adolescents. For example Naruto or Private investigator Conan you can read and believe you are the character on there. Therefore , not at all of book tend to be make you bored, any it can make you feel happy, fun and unwind. Try to choose the best book to suit your needs and try to like reading which.

Anna Baron:

A number of people said that they feel uninterested when they reading a publication. They are directly felt it when they get a half portions of the book. You can choose the actual book Laravel 5 Essentials to make your personal reading is interesting. Your own skill of reading ability is developing when you like reading. Try to choose basic book to make you enjoy to study it and mingle the opinion about book and looking at especially. It is to be 1st opinion for you to like to wide open a book and examine it. Beside that the e-book Laravel 5 Essentials can to be your friend when you're truly feel alone and confuse in doing what must you're doing of their time.
