Pro Linux High Availability Clustering

Sander van Vugt

Pro Linux High Availability Clustering Sander van Vugt

Pro Linux High Availability Clustering teaches you how to implement this fundamental Linux add-on into your business. Linux High Availability Clustering is needed to ensure the availability of mission critical resources. The technique is applied more and more in corporate datacenters around the world. While lots of documentation about the subject is available on the internet, it isn't always easy to build a real solution based on that scattered information, which is often oriented towards specific tasks only. *Pro Linux High Availability Clustering* explains essential high-availability clustering components on all Linux platforms, giving you the insight to build solutions for any specific case needed.

In this book four common cases will be explained:

- Configuring Apache for high availability
- Creating an Open Source SAN based on DRBD, iSCSI and HA clustering
- Setting up a load-balanced web server cluster with a back-end, highly-available database
- Setting up a KVM virtualization platform with high-availability protection for a virtual machine.

With the knowledge you'll gain from these real-world applications, you'll be able to efficiently apply Linux HA to your work situation with confidence.

Author Sander Van Vugt teaches Linux high-availability clustering on training courses, uses it in his everyday work, and now brings this knowledge to you in one place, with clear examples and cases. Make the best start with HA clustering with *Pro Linux High Availability Clustering* at your side.

What you'll learn

- Design Linux high availability clusters
- Set up an environment to protect mission critical applications
- Connecting servers in a redundant way to the SAN
- Create an affordable SAN based on open source software
- Set up clusters for protection of Oracle and SAP workloads
- Write your own cluster resource script
- Create an open source SAN
- Create a free hypervisor using KVM as the virtualization platform
- Set up a versatile, fault-tolerant, high-performance web shop

Who this book is for

This book is for technical skilled Linux system administrators that want to learn how they can enhance application availability by using Linux High Availability clusters.

From reader reviews:

Gary Lane:

Have you spare time for the day? What do you do when you have more or little spare time? Yeah, you can choose the suitable activity intended for spend your time. Any person spent their own spare time to take a walk, shopping, or went to the particular Mall. How about open or perhaps read a book eligible Pro Linux High Availability Clustering? Maybe it is to be best activity for you. You realize beside you can spend your time together with your favorite's book, you can better than before. Do you agree with its opinion or you have other opinion?

Betty McClanahan:

The book Pro Linux High Availability Clustering give you a sense of feeling enjoy for your spare time. You can use to make your capable a lot more increase. Book can to get your best friend when you getting pressure or having big problem with your subject. If you can make reading through a book Pro Linux High Availability Clustering being your habit, you can get far more advantages, like add your capable, increase your knowledge about many or all subjects. You may know everything if you like available and read a e-book Pro Linux High Availability Clustering. Kinds of book are several. It means that, science reserve or encyclopedia or other individuals. So , how do you think about this publication?

Gregory McCormick:

This book untitled Pro Linux High Availability Clustering to be one of several books that will best seller in this year, honestly, that is because when you read this book you can get a lot of benefit upon it. You will easily to buy this particular book in the book retail outlet or you can order it through online. The publisher in this book sells the e-book too. It makes you quickly to read this book, as you can read this book in your Cell phone. So there is no reason to your account to past this e-book from your list.

Andrew Leavens:

The reserve untitled Pro Linux High Availability Clustering is the book that recommended to you to learn. You can see the quality of the guide content that will be shown to an individual. The language that author use to explained their ideas are easily to understand. The copy writer was did a lot of research when write the book, and so the information that they share to your account is absolutely accurate. You also could possibly get the e-book of Pro Linux High Availability Clustering from the publisher to make you much more enjoy free time.
