**Complex Systems and Society (SpringerBriefs in Mathematics)** Nicola Bellomo, Giulia Ajmone Marsan, Andrea Tosin

This work aims to foster the interdisciplinary dialogue between mathematicians and socio-economic scientists. Interaction among scholars and practitioners traditionally coming from different research areas is necessary more than ever in order to better understand many real-world problems we face today. On the one hand, mathematicians need economists and social scientists to better address the methodologies they design in a more realistic way; on the other hand, economists and social scientists need to be aware of sound mathematical modelling tools in order to understand and, ultimately, solve the complex problems they encounter in their research. With this goal in mind, this work is designed to take into account a multidisciplinary approach that will encourage the transfer of knowledge, ideas, and methodology from one discipline to the other. In particular, the work has three main themes: Demystifying and unravelling complex systems; Introducing models of individual behaviours in the social and economic sciences; Modelling socio-economic sciences as complex living systems. Specific tools examined in the work include a recently developed modelling approach using stochastic game theory within the framework of statistical mechanics and progressing up to modeling Darwinian evolution. Special attention is also devoted to social network theory as a fundamental instrument for the understanding of socio-economic systems.

**From reader reviews:**

**Patrick Sherman:**

Precisely why? Because this Complex Systems and Society (SpringerBriefs in Mathematics) is an unordinary book that the inside of the book waiting for you to snap that but latter it will surprise you with the secret that inside. Reading this book beside it was fantastic author who all write the book in such awesome way makes the content interior easier to understand, entertaining method but still convey the meaning thoroughly. So , it is good for you for not hesitating having this anymore or you going to regret it. This book will give you a lot of positive aspects than the other book possess such as help improving your ability and your critical thinking technique. So , still want to hesitate having that book? If I ended up you I will go to the reserve store hurriedly.

**Beverly Barber:**

Are you kind of busy person, only have 10 or 15 minute in your time to upgrading your mind ability or thinking skill also analytical thinking? Then you are having problem with the book compared to can satisfy your short space of time to read it because pretty much everything time you only find reserve that need more time to be study. Complex Systems and Society (SpringerBriefs in Mathematics) can be your answer since it can be read by an individual who have those short time problems.

**Wendell Holloway:**

With this era which is the greater person or who has ability to do something more are more valuable than other. Do you want to become one among it? It is just simple solution to have that. What you should do is just spending your time almost no but quite enough to have a look at some books. One of many books in the top listing in your reading list will be Complex Systems and Society (SpringerBriefs in Mathematics). This book that is qualified as The Hungry Slopes can get you closer in turning out to be precious person. By looking way up and review this book you can get many advantages.

**Ann Craft:**

Reading a reserve make you to get more knowledge from this. You can take knowledge and information from your book. Book is published or printed or outlined from each source that filled update of news. In this modern era like now, many ways to get information are available for an individual. From media social such as newspaper, magazines, science publication, encyclopedia, reference book, novel and comic. You can add your understanding by that book. Do you want to spend your spare time to open your book? Or just seeking the Complex Systems and Society (SpringerBriefs in Mathematics) when you needed it?
