Molecular Genetics in Fisheries

Gary R. Carvalho, Tony J. Pitcher

Molecular Genetics in Fisheries Gary R. Carvalho, Tony J. Pitcher

The basic principle of all molecular genetic methods is to employ inherited, discrete and stable markers to identify genotypes that characterize individuals, populations or species. Such genetic data can provide information on the levels and distribution of genetic variability in relation to mating patterns, life history, population size, migration and environment. Although molecular tools have long been employed to address various questions in fisheries biology and management, their contributions to the field are sometimes unclear, and often controversial. Much of the initial impetus for the deployment of molecular markers arose from the desire to assess fish stock structure based on various interpretations of the stock concept. Although such studies have met with varying success, they continue to provide an impetus for the development of increasingly sensitive population discriminators, yielding information that can be valuable for both sustainable exploitation and the conservation of fish populations. In the last major synthesis of the subject, Ryman and Utter (1987) summarized progress and applications, though this was prior to the wide-scale adoption of DNA methodology. New sources of genetic markers and protocols are now available, in particular those that exploit the widely distributed and highly variable repeat sequences of DNA, and the amplification technique of the polymerase chain reaction.

From reader reviews:

Kathleen Elder:

Book will be written, printed, or outlined for everything. You can recognize everything you want by a book. Book has a different type. We all know that that book is important thing to bring us around the world. Next to that you can your reading talent was fluently. A e-book Molecular Genetics in Fisheries will make you to become smarter. You can feel a lot more confidence if you can know about everything. But some of you think in which open or reading some sort of book make you bored. It is not make you fun. Why they could be thought like that? Have you trying to find best book or suitable book with you?

Lisa Rice:

Reading a reserve can be one of a lot of task that everyone in the world really likes. Do you like reading book and so. There are a lot of reasons why people enjoyed. First reading a book will give you a lot of new data. When you read a book you will get new information simply because book is one of many ways to share the information or maybe their idea. Second, studying a book will make an individual more imaginative. When you examining a book especially hype book the author will bring you to imagine the story how the personas do it anything. Third, you may share your knowledge to other people. When you read this Molecular Genetics in Fisheries, you are able to tells your family, friends as well as soon about yours e-book. Your knowledge can inspire others, make them reading a publication.

Bruce Healy:

Beside this particular Molecular Genetics in Fisheries in your phone, it might give you a way to get closer to the new knowledge or info. The information and the knowledge you may got here is fresh through the oven so don't always be worry if you feel like an outdated people live in narrow small town. It is good thing to have Molecular Genetics in Fisheries because this book offers to you readable information. Do you sometimes have book but you do not get what it's about. Oh come on, that would not happen if you have this within your hand. The Enjoyable agreement here cannot be questionable, such as treasuring beautiful island. So do you still want to miss this? Find this book and also read it from right now!

Lillian Kea:

As we know that book is significant thing to add our knowledge for everything. By a e-book we can know everything we wish. A book is a pair of written, printed, illustrated or perhaps blank sheet. Every year had been exactly added. This book Molecular Genetics in Fisheries was filled about science. Spend your free time to add your knowledge about your research competence. Some people has distinct feel when they reading some sort of book. If you know how big good thing about a book, you can experience enjoy to read a book. In the modern era like today, many ways to get book that you wanted.
