# Data Stream Management: Processing High-Speed Data Streams (Data-Centric Systems and Applications)

# Data Stream Management: Processing High-Speed Data Streams (Data-Centric Systems and Applications)

**Data Stream Management: Processing High-Speed Data Streams (Data-Centric Systems and Applications)**

This volume focuses on the theory and practice of *data stream management*, and the novel challenges this emerging domain poses for data-management algorithms, systems, and applications. The collection of chapters, contributed by authorities in the field, offers a comprehensive introduction to both the algorithmic/theoretical foundations of data streams, as well as the streaming systems and applications built in different domains.

A short introductory chapter provides a brief summary of some basic data streaming concepts and models, and discusses the key elements of a generic stream query processing architecture. Subsequently, Part I focuses on basic streaming algorithms for some key analytics functions (e.g., quantiles, norms, join aggregates, heavy hitters) over streaming data. Part II then examines important techniques for basic stream mining tasks (e.g., clustering, classification, frequent itemsets). Part III discusses a number of advanced topics on stream processing algorithms, and Part IV focuses on system and language aspects of data stream processing with surveys of influential system prototypes and language designs. Part V then presents some representative applications of streaming techniques in different domains (e.g., network management, financial analytics). Finally, the volume concludes with an overview of current data streaming products and new application domains (e.g. cloud computing, big data analytics, and complex event processing), and a discussion of future directions in this exciting field.

The book provides a comprehensive overview of core concepts and technological foundations, as well as various systems and applications, and is of particular interest to students, lecturers and researchers in the area of data stream management.

**From reader reviews:**

**Angela Drew:**

Spent a free the perfect time to be fun activity to accomplish! A lot of people spent their spare time with their family, or their particular friends. Usually they accomplishing activity like watching television, gonna beach, or picnic in the park. They actually doing same task every week. Do you feel it? Do you want to something different to fill your personal free time/ holiday? Could be reading a book might be option to fill your free time/ holiday. The first thing that you ask may be what kinds of reserve that you should read. If you want to try out look for book, may be the guide untitled Data Stream Management: Processing High-Speed Data Streams (Data-Centric Systems and Applications) can be great book to read. May be it could be best activity to you.

**Mary Deemer:**

Do you have something that you enjoy such as book? The e-book lovers usually prefer to choose book like comic, limited story and the biggest the first is novel. Now, why not seeking Data Stream Management: Processing High-Speed Data Streams (Data-Centric Systems and Applications) that give your entertainment preference will be satisfied simply by reading this book. Reading behavior all over the world can be said as the means for people to know world a great deal better then how they react when it comes to the world. It can't be stated constantly that reading habit only for the geeky person but for all of you who wants to possibly be success person. So , for all you who want to start looking at as your good habit, it is possible to pick Data Stream Management: Processing High-Speed Data Streams (Data-Centric Systems and Applications) become your own personal starter.

**Larry Cain:**

The book untitled Data Stream Management: Processing High-Speed Data Streams (Data-Centric Systems and Applications) contain a lot of information on it. The writer explains your girlfriend idea with easy approach. The language is very simple to implement all the people, so do not really worry, you can easy to read the idea. The book was authored by famous author. The author will bring you in the new period of literary works. You can actually read this book because you can please read on your smart phone, or model, so you can read the book inside anywhere and anytime. If you want to buy the e-book, you can wide open their official web-site in addition to order it. Have a nice examine.

**Loren Hatmaker:**

It is possible to spend your free time you just read this book this book. This Data Stream Management: Processing High-Speed Data Streams (Data-Centric Systems and Applications) is simple bringing you can read it in the park, in the beach, train as well as soon. If you did not include much space to bring the particular printed book, you can buy typically the e-book. It is make you quicker to read it. You can save the book in your smart phone. And so there are a lot of benefits that you will get when one buys this book.
