This critical analysis looks at the disproportionate number of African American males in special education. Arguing that the problem is race and gender driven, questions covered include *Why does Europe send more females to special education? Why does America lead the world in giving children Ritalin? Is there a relationship between sugar, Ritalin, and cocaine?* and *Is there a relationship between special education and prison?* More than 100 strategies to help teachers and parents keep black boys in the regular classroom, such as revising teacher expectations, increasing parental involvement, changing teaching styles from a left-brain abstract approach to a right-brain hands-on approach, redoing the curriculum, understanding the impact of mass media, and fostering healthy eating habits.
