**Statistical Matching: Theory and Practice (Wiley Series in Survey Methodology)** Marcello D'Orazio, Marco Di Zio, Mauro Scanu

There is more statistical data produced in today's modern society than ever before. This data is analysed and cross-referenced for innumerable reasons. However, many data sets have no shared element and are harder to combine and therefore obtain any meaningful inference from. Statistical matching allows just that; it is the art of combining information from different sources (particularly sample surveys) that contain no common unit. In response to modern influxes of data, it is an area of rapidly growing interest and complexity.

*Statistical Matching: Theory and Practice* introduces the basics of statistical matching, before going on to offer a detailed, up-to-date overview of the methods used and an examination of their practical applications.

- Presents a unified framework for both theoretical and practical aspects of statistical matching.
- Provides a detailed description covering all the steps needed to perform statistical matching.
- Contains a critical overview of the available statistical matching methods.
- Discusses all the major issues in detail, such as the Conditional Independence Assumption and the assessment of uncertainty.
- Includes numerous examples and applications, enabling the reader to apply the methods in their own work.
- Features an appendix detailing algorithms written in the R language.

*Statistical Matching: Theory and Practice* presents a comprehensive exploration of an increasingly important area. Ideal for researchers in national statistics institutes and applied statisticians, it will also prove to be an invaluable text for scientists and researchers from all disciplines engaged in the multivariate analysis of data collected from different sources.

**From reader reviews:**

**Gloria Brower:**

What do you think of book? It is just for students since they are still students or the idea for all people in the world, what the best subject for that? Merely you can be answered for that concern above. Every person has distinct personality and hobby per other. Don't to be obligated someone or something that they don't would like do that. You must know how great and also important the book Statistical Matching: Theory and Practice (Wiley Series in Survey Methodology). All type of book can you see on many sources. You can look for the internet options or other social media.

**Susan Albro:**

In this 21st centuries, people become competitive in each way. By being competitive today, people have do something to make these individuals survives, being in the middle of the particular crowded place and notice by surrounding. One thing that at times many people have underestimated this for a while is reading. Yep, by reading a e-book your ability to survive increase then having chance to endure than other is high. For you personally who want to start reading a book, we give you this kind of Statistical Matching: Theory and Practice (Wiley Series in Survey Methodology) book as basic and daily reading publication. Why, because this book is greater than just a book.

**Lula Day:**

Spent a free time to be fun activity to accomplish! A lot of people spent their sparetime with their family, or their very own friends. Usually they accomplishing activity like watching television, gonna beach, or picnic from the park. They actually doing same task every week. Do you feel it? Would you like to something different to fill your current free time/ holiday? May be reading a book can be option to fill your free time/ holiday. The first thing that you will ask may be what kinds of book that you should read. If you want to try look for book, may be the e-book untitled Statistical Matching: Theory and Practice (Wiley Series in Survey Methodology) can be fine book to read. May be it might be best activity to you.

**Siobhan Wilcox:**

The particular book Statistical Matching: Theory and Practice (Wiley Series in Survey Methodology) has a lot of information on it. So when you check out this book you can get a lot of help. The book was authored by the very famous author. The author makes some research before write this book. This specific book very easy to read you will get the point easily after scanning this book.
