## **The biochemistry of the Nucleic Acids** J.N. Davidson

The Biochemistry of the Nucleic Acids provides an elementary outline of the main biochemical features of nucleic acids and nucleoproteins. The book describes the occurrence and biological functions of nucleic acids, their chemical constituents, and catabolism.

This text is organized into 14 chapters and begins with a historical overview, from the discovery of the nucleic acids to their isolation and characterization. The discussion then shifts to bacterial transforming factors and transduction phenomena, along with the genetic function and metabolic stability of DNA, the chemical composition of the cell nucleus, and the Feulgen nuclear reaction. The reader is methodically introduced to the structure and biosynthesis of RNA and DNA; nucleic acids found in viruses; and biosynthesis of mononucleotides. An account of nucleases and related enzymes is also given. A chapter on the precise mechanism by which nucleic acids are broken down in the cell concludes the book.

This book is intended for students of biochemistry, chemists, and biologists.

### From reader reviews:

#### Frances Oberlin:

The book The biochemistry of the Nucleic Acids can give more knowledge and also the precise product information about everything you want. Exactly why must we leave the best thing like a book The biochemistry of the Nucleic Acids? Wide variety you have a different opinion about book. But one aim in which book can give many facts for us. It is absolutely suitable. Right now, try to closer together with your book. Knowledge or information that you take for that, you may give for each other; you are able to share all of these. Book The biochemistry of the Nucleic Acids has simple shape however you know: it has great and massive function for you. You can look the enormous world by open and read a publication. So it is very wonderful.

#### Edward Carter:

As people who live in the particular modest era should be revise about what going on or details even knowledge to make these keep up with the era that is certainly always change and move ahead. Some of you maybe will certainly update themselves by looking at books. It is a good choice for you personally but the problems coming to anyone is you don't know which you should start with. This The biochemistry of the Nucleic Acids is our recommendation to make you keep up with the world. Why, as this book serves what you want and wish in this era.

#### Mac Cutter:

Reading a e-book tends to be new life style in this particular era globalization. With looking at you can get a lot of information that may give you benefit in your life. Using book everyone in this world can easily share their idea. Ebooks can also inspire a lot of people. Plenty of author can inspire their reader with their story or maybe their experience. Not only the storyplot that share in the publications. But also they write about the information about something that you need case in point. How to get the good score toefl, or how to teach your kids, there are many kinds of book that you can get now. The authors on this planet always try to improve their talent in writing, they also doing some investigation before they write to their book. One of them is this The biochemistry of the Nucleic Acids.

#### Cheryl Edgerly:

As a college student exactly feel bored for you to reading. If their teacher inquired them to go to the library or to make summary for some publication, they are complained. Just tiny students that has reading's soul or real their passion. They just do what the trainer want, like asked to go to the library. They go to at this time there but nothing reading significantly. Any students feel that studying is not important, boring in addition to can't see colorful photographs on there. Yeah, it is to be complicated. Book is very important in your case. As we know that on this period, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. Therefore , this The biochemistry of the Nucleic Acids can make you experience more interested to read.
