In Detail

Securing ERP is the main issue nowadays; it is not only about bits and bytes of network traffic, but also about business transactions, users' privileges and access rights. Hackers raise their awareness to hack and attack ERP systems as the information becomes the vital weapon these days. So securing your ERP is not only about internal control and auditing procedures, but also to protect your entire system against outsiders or unauthorized users. It's the time to secure your ERP system.

"Microsoft Dynamics AX 2012 Security - How to" is a practical, hands-on guide that provides you with a clear step-by-step exercise, which will help you, achieve the practical experience to implement the new security features within MS Dynamics AX 2012.
