Immunotherapy with Intravenous Immunoglobulins

Immunotherapy with Intravenous Immunoglobulins

The use of intravenous human antibodies in the treatment of primary immunodeficiencies is well recognized. However, it is now evident that they also have therapeutic potential for a wide range of other clinical disorders. This book describes the use of human antibodies in the management of secondary (virus-induced) immunodeficiencies, neonatal and perinatal infections, and autoimmunity. Insight into their mechanism of action is also provided.
