Non-Radioactive Labelling: A Practical Introduction (Biological Techniques Series)

A. J. Garman

Non-Radioactive Labelling: A Practical Introduction (Biological Techniques Series) A. J. Garman
Biological Techniques is a series of volumes aimed at introducing to a wide audience the latest advances in methodology. The pitfalls and problems of new techniques are given due consideration, as are those small but vital details not always explicit in the methods sections of journal papers.

In recent years, most biological laboratories have been invaded by computers and a wealth of new DNA technology and this will be reflected in many of the titles appearing in the series.

The books will be of value to advanced researchers and graduate students seeking to learn and apply new techniques, and will be useful to teachers of advanced undergraduate courses involving practical or project work.

Labelled biomolecules are an essential tool in life science research, and non-radioactive labels are becoming increasingly important due to their convenience of measurement, greater safety and lack of disposal problems compared to radioactive labels.

This book provides practical information, background theory and protocols to allow a beginner to label many types of biomolecules, including proteins, peptides, nucleic acids and small molecules.

This book is essential for biochemists, molecular biologists and cell biologists wanting to use non-radioactively labelled molecules.

Key Features

- * Aimed at researchers without specific expertise in chemistry, the book includes:
- * A review of the main signal systems and labels available, indicating their strengths and weaknesses
- * Discussion of the most useful strategies for labelling the various biomolecules
- * 32 protocols covering common labelling needs
- * Descriptions of the factors governing protocol design, enabling protocols to be modified for different applications
- * Sources of information including references, data and suppliers

From reader reviews:

Travis McDonald:

This book untitled Non-Radioactive Labelling: A Practical Introduction (Biological Techniques Series) to be one of several books in which best seller in this year, that's because when you read this e-book you can get a lot of benefit into it. You will easily to buy this book in the book retailer or you can order it by means of online. The publisher on this book sells the e-book too. It makes you quickly to read this book, because you can read this book in your Cell phone. So there is no reason for you to past this guide from your list.

Norma Harrell:

This Non-Radioactive Labelling: A Practical Introduction (Biological Techniques Series) is great e-book for you because the content which can be full of information for you who all always deal with world and also have to make decision every minute. This kind of book reveal it info accurately using great organize word or we can state no rambling sentences in it. So if you are read the item hurriedly you can have whole info in it. Doesn't mean it only provides you with straight forward sentences but challenging core information with wonderful delivering sentences. Having Non-Radioactive Labelling: A Practical Introduction (Biological Techniques Series) in your hand like obtaining the world in your arm, facts in it is not ridiculous one particular. We can say that no guide that offer you world with ten or fifteen tiny right but this reserve already do that. So , this is certainly good reading book. Hey there Mr. and Mrs. busy do you still doubt that will?

Jeremy Hutchings:

Many people spending their moment by playing outside along with friends, fun activity using family or just watching TV all day every day. You can have new activity to invest your whole day by reading through a book. Ugh, think reading a book will surely hard because you have to bring the book everywhere? It ok you can have the e-book, having everywhere you want in your Mobile phone. Like Non-Radioactive Labelling: A Practical Introduction (Biological Techniques Series) which is obtaining the e-book version. So , try out this book? Let's see.

Edgar Workman:

Some individuals said that they feel uninterested when they reading a e-book. They are directly felt the item when they get a half regions of the book. You can choose the actual book Non-Radioactive Labelling: A Practical Introduction (Biological Techniques Series) to make your own reading is interesting. Your personal skill of reading ability is developing when you like reading. Try to choose straightforward book to make you enjoy to read it and mingle the opinion about book and looking at especially. It is to be initially opinion for you to like to start a book and go through it. Beside that the publication Non-Radioactive Labelling: A Practical Introduction (Biological Techniques Series) can to be your friend when you're truly feel alone and confuse in doing what must you're doing of the time.
