Latent Growth Curve Modeling: 157 (Quantitative Applications in the Social Sciences) Kristopher J. Preacher, Aaron Lee Wichman, Robert Charles MacCallum, Nancy E. Briggs

Latent growth curve modeling (LGM)—a special case of confirmatory factor analysis designed to model change over time—is an indispensable and increasingly ubiquitous approach for modeling longitudinal data. This volume introduces LGM techniques to researchers, provides easy-to-follow, didactic examples of several common growth modeling approaches, and highlights recent advancements regarding the treatment of missing data, parameter estimation, and model fit.

The book covers the basic linear LGM, and builds from there to describe more complex functional forms (e.g., polynomial latent curves), multivariate latent growth curves used to model simultaneous change in multiple variables, the inclusion of time-varying covariates, predictors of aspects of change, cohort-sequential designs, and multiple-group models. The authors also highlight approaches to dealing with missing data, different estimation methods, and incorporate discussion of model evaluation and comparison within the context of LGM. The models demonstrate how they may be applied to longitudinal data derived from the NICHD Study of Early Child Care and Youth Development (SECCYD)..

Key Features

- Provides easy-to-follow, didactic examples of several common growth modeling approaches
- Highlights recent advancements regarding the treatment of missing data, parameter estimation, and model fit
- Explains the commonalities and differences between latent growth model and multilevel modeling of repeated measures data
- Covers the basic linear latent growth model, and builds from there to describe more complex functional forms such as polynomial latent curves, multivariate latent growth curves, time-varying covariates, predictors of aspects of change, cohort-sequential designs, and multiple-group models

From reader reviews:

Gary Lewis:

The book untitled Latent Growth Curve Modeling: 157 (Quantitative Applications in the Social Sciences) contain a lot of information on that. The writer explains the woman idea with easy way. The language is very straightforward all the people, so do not worry, you can easy to read the idea. The book was compiled by famous author. The author will take you in the new time of literary works. You can read this book because you can please read on your smart phone, or device, so you can read the book in anywhere and anytime. In a situation you wish to purchase the e-book, you can available their official web-site and also order it. Have a nice go through.

Eddie Nelson:

In this time globalization it is important to someone to get information. The information will make someone to understand the condition of the world. The fitness of the world makes the information simpler to share. You can find a lot of referrals to get information example: internet, classifieds, book, and soon. You can see that now, a lot of publisher in which print many kinds of book. The actual book that recommended for your requirements is Latent Growth Curve Modeling: 157 (Quantitative Applications in the Social Sciences) this e-book consist a lot of the information in the condition of this world now. This kind of book was represented how does the world has grown up. The vocabulary styles that writer value to explain it is easy to understand. The writer made some study when he makes this book. This is why this book appropriate all of you.

Roy Matsumoto:

As we know that book is significant thing to add our information for everything. By a publication we can know everything we want. A book is a set of written, printed, illustrated or blank sheet. Every year seemed to be exactly added. This reserve Latent Growth Curve Modeling: 157 (Quantitative Applications in the Social Sciences) was filled concerning science. Spend your time to add your knowledge about your scientific research competence. Some people has distinct feel when they reading a new book. If you know how big selling point of a book, you can feel enjoy to read a e-book. In the modern era like today, many ways to get book that you just wanted.

Corey Johnson:

That reserve can make you to feel relax. That book Latent Growth Curve Modeling: 157 (Quantitative Applications in the Social Sciences) was multi-colored and of course has pictures on there. As we know that book Latent Growth Curve Modeling: 157 (Quantitative Applications in the Social Sciences) has many kinds or variety. Start from kids until adolescents. For example Naruto or Private eye Conan you can read and think that you are the character on there. Therefore not at all of book are generally make you bored, any it offers up you feel happy, fun and loosen up. Try to choose the best book for you personally and try to like

reading that.
