Tom Igoe

**Making Things Talk: Using Sensors, Networks, and Arduino to see, hear, and feel your world** Tom Igoe

**Make microcontrollers, PCs, servers, and smartphones talk to each other.**

Building electronic projects that interact with the physical world is good fun. But when the devices you've built start to talk to each other, things really get interesting. With 33 easy-to-build projects, *Making Things Talk* shows you how to get your gadgets to communicate with you and your environment. It's perfect for people with little technical training but a lot of interest.

Maybe you're a science teacher who wants to show students how to monitor the weather in several locations at once. Or a sculptor looking to stage a room of choreographed mechanical sculptures. In this expanded edition, you'll learn how to form networks of smart devices that share data and respond to commands.

- Call your home thermostat with a smartphone and change the temperature.
- Create your own game controllers that communicate over a network.
- Use ZigBee, Bluetooth, Infrared, and plain old radio to transmit sensor data wirelessly.
- Work with Arduino 1.0, Processing, and PHP—three easy-to-use, open source environments.
- Write programs to send data across the Internet, based on physical activity in your home, office, or backyard.

Whether you want to connect simple home sensors to the Internet, or create a device that can interact wirelessly with other gadgets, this book explains exactly what you need.

### **From reader reviews:**

#### **Cathy Thomas:**

Here thing why this particular Making Things Talk: Using Sensors, Networks, and Arduino to see, hear, and feel your world are different and trusted to be yours. First of all reading through a book is good but it really depends in the content of it which is the content is as yummy as food or not. Making Things Talk: Using Sensors, Networks, and Arduino to see, hear, and feel your world giving you information deeper including different ways, you can find any guide out there but there is no guide that similar with Making Things Talk: Using Sensors, Networks, and Arduino to see, hear, and feel your world. It gives you thrill studying journey, its open up your own personal eyes about the thing that happened in the world which is perhaps can be happened around you. You can easily bring everywhere like in park your car, café, or even in your approach home by train. In case you are having difficulties in bringing the paper book maybe the form of Making Things Talk: Using Sensors, Networks, and Arduino to see, hear, and feel your world in e-book can be your substitute.

#### **Gary Sandler:**

The actual book Making Things Talk: Using Sensors, Networks, and Arduino to see, hear, and feel your world has a lot details on it. So when you check out this book you can get a lot of help. The book was published by the very famous author. The writer makes some research just before write this book. That book very easy to read you may get the point easily after looking over this book.

#### **Susan Chestnut:**

Reading a book for being new life style in this yr; every people loves to study a book. When you go through a book you can get a lot of benefit. When you read books, you can improve your knowledge, mainly because book has a lot of information in it. The information that you will get depend on what types of book that you have read. If you want to get information about your examine, you can read education books, but if you want to entertain yourself you are able to a fiction books, such us novel, comics, and soon. The Making Things Talk: Using Sensors, Networks, and Arduino to see, hear, and feel your world will give you a new experience in looking at a book.

#### **Frankie Lampkins:**

In this era which is the greater particular person or who has ability to do something more are more valuable than other. Do you want to become certainly one of it? It is just simple approach to have that. What you should do is just spending your time almost no but quite enough to enjoy a look at some books. One of many books in the top collection in your reading list is usually Making Things Talk: Using Sensors, Networks, and Arduino to see, hear, and feel your world. This book which is qualified as The Hungry Hillside can get you closer in getting precious person. By looking upwards and review this reserve you can get many advantages.
