## **The Battleship HMS Dreadnought (Super Drawings in 3D)** Stefan Draminski

The text part of this book describes technical specifications of the ship and detailed history of her construction and service. This is accompanied by more than 100 color illustrations showing HMS Dreadnought's appearance in 1907, at the beginning of her career.

Elements that are shown in detail include armament, boats, rig, etc. Additionally, numerous illustrations present the ship with her torpedo nets rigged. Blueprints in 1:700, 1:350, 1:200, 1:100 and 1:50 scales (general views and details) are included on a separate sheet. The publication is a great reference for building a detailed model of HMS Dreadnought.

## REVIEWS

"provides invaluable references...over 100 stunning digital color illustrations...detail incorporated within the 3D artwork is astonishing..."

Model Magazine International

another great work from Kagero that will provide the historian and modeler with some great references of this new combatant concept that would be echoed in the US with the USS South Carolina and in Japan based on their own lessons learned in battle  
CyberModeler
