The Future of Affirmative Action: New Paths to Higher Education Diversity after Fisher v. University of Texas

As the United States experiences dramatic demographic change—and as our society's income inequality continues to rise—promoting racial, ethnic, and economic inclusion at selective colleges has become more important than ever. At the same time, however, many Americans—including several members of the U.S. Supreme Court—are uneasy with explicitly using race as a factor in college admissions. The Court's decision in *Fisher v. University of Texas* emphasized that universities can use race in admissions only when "necessary," and that universities bear "the ultimate burden of demonstrating, before turning to racial classifications, that available, workable race-neutral alternatives do not suffice."

With race-based admission programs increasingly curtailed, *The Future of Affirmative Action* explores race-neutral approaches as a method of promoting college diversity after Fisher decision. The volume suggests that Fisher might on the one hand be a further challenge to the use of racial criteria in admissions, but on the other presents a new opportunity to tackle, at long last, the burgeoning economic divisions in our system of higher education, and in society as a whole.
