## **Mining Human Mobility in Location-Based Social Networks (Synthesis Lectures on Data Mining and Knowledge Discover) Huiji Gao, Haun Liu**

In recent years, there has been a rapid growth of location-based social networking services, such as Foursquare and Facebook Places, which have attracted an increasing number of users and greatly enriched their urban experience. Typical location-based social networking sites allow a user to "check in" at a real-world POI (point of interest, e.g., a hotel, restaurant, theater, etc.), leave tips toward the POI, and share the check-in with their online friends. The check-in action bridges the gap between real world and online social networks, resulting in a new type of social networks, namely location-based social networks (LBSNs). Compared to traditional GPS data, location-based social networks data contains unique properties with abundant heterogeneous information to reveal human mobility, i.e., "when and where a user (who) has been to for what," corresponding to an unprecedented opportunity to better understand human mobility from spatial, temporal, social, and content aspects. The mining and understanding of human mobility can further lead to effective approaches to improve current location-based services from mobile marketing to recommender systems, providing users more convenient life experience than before. This book takes a data mining perspective to offer an overview of studying human mobility in location-based social networks and illuminate a wide range of related computational tasks. It introduces basic concepts, elaborates associated challenges, reviews state-of-the-art algorithms with illustrative examples and real-world LBSN datasets, and discusses effective evaluation methods in mining human mobility. In particular, we illustrate unique characteristics and research opportunities of LBSN data, present representative tasks of mining human mobility on location-based social networks, including capturing user mobility patterns to understand when and where a user commonly goes (location prediction), and exploiting user preferences and location profiles to investigate where and when a user wants to explore (location recommendation), along with studying a user's check-in activity in terms of why a user goes to a certain location.

### **From reader reviews:**

#### **Edward Christensen:**

Book is written, printed, or created for everything. You can understand everything you want by a book. Book has a different type. We all know that that book is important point to bring us around the world. Next to that you can your reading expertise was fluently. A publication Mining Human Mobility in Location-Based Social Networks (Synthesis Lectures on Data Mining and Knowledge Discover) will make you to end up being smarter. You can feel far more confidence if you can know about almost everything. But some of you think that will open or reading the book make you bored. It is not necessarily make you fun. Why they might be thought like that? Have you looking for best book or acceptable book with you?

#### **Philip Raber:**

Often the book Mining Human Mobility in Location-Based Social Networks (Synthesis Lectures on Data Mining and Knowledge Discover) has a lot details on it. So when you make sure to read this book you can get a lot of profit. The book was written by the very famous author. This articles author makes some research just before write this book. This kind of book very easy to read you may get the point easily after looking over this book.

#### **Nellie Nelson:**

This Mining Human Mobility in Location-Based Social Networks (Synthesis Lectures on Data Mining and Knowledge Discover) is great publication for you because the content that is certainly full of information for you who also always deal with world and also have to make decision every minute. This kind of book reveal it facts accurately using great plan word or we can state no rambling sentences within it. So if you are read this hurriedly you can have whole facts in it. Doesn't mean it only provides you with straight forward sentences but tricky core information with lovely delivering sentences. Having Mining Human Mobility in Location-Based Social Networks (Synthesis Lectures on Data Mining and Knowledge Discover) in your hand like finding the world in your arm, information in it is not ridiculous one. We can say that no reserve that offer you world within ten or fifteen tiny right but this book already do that. So , this can be good reading book. Hi Mr. and Mrs. hectic do you still doubt this?

#### **David Dozier:**

A number of people said that they feel uninterested when they reading a guide. They are directly felt this when they get a half parts of the book. You can choose the book Mining Human Mobility in Location-Based Social Networks (Synthesis Lectures on Data Mining and Knowledge Discover) to make your personal reading is interesting. Your own personal skill of reading proficiency is developing when you just like reading. Try to choose simple book to make you enjoy to read it and mingle the idea about book and reading through especially. It is to be initially opinion for you to like to open a book and learn it. Beside that the book Mining Human Mobility in Location-Based Social Networks (Synthesis Lectures on Data Mining and

Knowledge Discover) can to be your brand new friend when you're sense alone and confuse with what must you're doing of their time.
