Taurine 8: Volume 1: The Nervous System, Immune System, Diabetes and the Cardiovascular System: 775 (Advances in Experimental Medicine and Biology)

Taurine 8 represents the combined efforts of investigators on the roles of the amino acid taurine on human health and disease. The chapters covered in this book are directly derived from presentations of the contributors at the 18th International Taurine Meeting held in Marrakech, Morocco in April 2012. The purpose of this book is to disseminate current findings on taurine's contribution in several organ systems. This book covers the following topics: Taurine in the Nervous System, Taurine in the Immune System, Taurine and Diabetes, and Taurine and the Cardiovascular System. Dr. Abdeslem El Idrissi, College of Staten Island and Dr. William L'Amoreaux, College of Staten Island, were co-chairs of the Organizing Committee for the meeting.

Data presented at this meeting provided compelling evidence that taurine is not only cytoprotective in cardiomyocytes, but also is a potent GABA agonist, whereby it can facilitate vasodilation of conducting arteries. Taurine conjugates, such as taurine chloramine, may protect cells from oxidative stress via increased HO-1 expression. In adult rodents, taurine has a potent effect on plasma glucose levels, likely through the release of insulin in pancreatic beta cells. As a potential neurotransmitter, taurine is known to work via the GABAergic system, but current research presented at this meeting suggest that taurine may interact with glutamate and serotonin receptors as well. Data are also presented to demonstrate the protective roles of taurine on neurons in neuroblastoma. Perhaps the most important and exciting presentation is the role of taurine and alcohol: the combination may be lethal. Data are also presented at this meeting of the potential role taurine may have as an adjuvant treatment with cisplatin in chemotherapy.

From reader reviews:

Rosa Tarpley:

As people who live in typically the modest era should be upgrade about what going on or facts even knowledge to make these keep up with the era that is certainly always change and make progress. Some of you maybe will probably update themselves by reading books. It is a good choice for yourself but the problems coming to you is you don't know what one you should start with. This Taurine 8: Volume 1: The Nervous System, Immune System, Diabetes and the Cardiovascular System: 775 (Advances in Experimental Medicine and Biology) is our recommendation to help you keep up with the world. Why, as this book serves what you want and wish in this era.

Jon Gonzalez:

Spent a free time for you to be fun activity to complete! A lot of people spent their leisure time with their family, or their particular friends. Usually they undertaking activity like watching television, planning to beach, or picnic inside the park. They actually doing same task every week. Do you feel it? Would you like to something different to fill your current free time/ holiday? May be reading a book might be option to fill your no cost time/ holiday. The first thing you will ask may be what kinds of e-book that you should read. If you want to attempt look for book, may be the reserve untitled Taurine 8: Volume 1: The Nervous System, Immune System, Diabetes and the Cardiovascular System: 775 (Advances in Experimental Medicine and Biology) can be excellent book to read. May be it may be best activity to you.

Eric Baur:

That book can make you to feel relax. That book Taurine 8: Volume 1: The Nervous System, Immune System, Diabetes and the Cardiovascular System: 775 (Advances in Experimental Medicine and Biology) was multi-colored and of course has pictures around. As we know that book Taurine 8: Volume 1: The Nervous System, Immune System, Diabetes and the Cardiovascular System: 775 (Advances in Experimental Medicine and Biology) has many kinds or type. Start from kids until young adults. For example Naruto or Investigation company Conan you can read and believe that you are the character on there. Therefore , not at all of book usually are make you bored, any it can make you feel happy, fun and loosen up. Try to choose the best book to suit your needs and try to like reading in which.

James Esparza:

What is your hobby? Have you heard this question when you got learners? We believe that that question was given by teacher to the students. Many kinds of hobby, Everyone has different hobby. And you know that little person like reading or as reading become their hobby. You should know that reading is very important along with book as to be the point. Book is important thing to incorporate you knowledge, except your teacher or lecturer. You get good news or update concerning something by book. Numerous books that can you take to be your object. One of them are these claims Taurine 8: Volume 1: The Nervous System,

Immune System, Diabetes and the Cardiovascular System: 775 (Advances in Experimental Medicine and Biology).
