Chapter 20, Emerging Contaminants Y. Pico

NOTE: This is a single chapter excerpted from the book *Chemical Analysis of Food: Techniques and Applications*, made available for individual purchase. Additional chapters, as well as the entire book, may be purchased separately.

Chemical Analysis of Food: Techniques and Applications reviews new technology and challenges in food analysis from multiple perspectives: a review of novel technologies being used in food analysis, an in-depth analysis of several specific approaches, and an examination of the most innovative applications and future trends. This book won a 2012 PROSE Award Honorable Mention in Chemistry and Physics from the Association of American Publishers.

The book is structured in two parts: the first describes the role of the latest developments in analytical and bio-analytical techniques and the second reviews the most innovative applications and issues in food analysis. Each chapter is written by experts on the subject and is extensively referenced in order to serve as an effective resource for more detailed information. The techniques discussed range from the non-invasive and non-destructive, such as infrared spectroscopy and ultrasound, to emerging areas such as nanotechnology, biosensors and electronic noses and tongues. Important tools for problem-solving in chemical and biological analysis are discussed in detail.

Winner of a PROSE Award 2012, Book: Honorable Mention in Physical Sciences & Mathematics - Chemistry and Physics from the American Association of Publishers.

- Provides researchers with a single source for up-to-date information in food analysis
- Single go-to reference for emerging techniques and technologies
- Over 20 renowned international contributors
- Broad coverage of many important techniques makes this reference useful for a range of food scientists

From reader reviews:

Freddie Patton:

In this 21st millennium, people become competitive in each way. By being competitive today, people have do something to make these individuals survives, being in the middle of often the crowded place and notice simply by surrounding. One thing that at times many people have underestimated that for a while is reading. Yeah, by reading a publication your ability to survive increase then having chance to stand up than other is high. For you who want to start reading a book, we give you this kind of Chapter 20, Emerging Contaminants book as beginning and daily reading guide. Why, because this book is more than just a book.

Brian Wallace:

Typically the book Chapter 20, Emerging Contaminants has a lot details on it. So when you read this book you can get a lot of advantage. The book was published by the very famous author. The author makes some research before write this book. This kind of book very easy to read you will get the point easily after scanning this book.

Kendrick Mills:

Reading can called brain hangout, why? Because if you find yourself reading a book especially book entitled Chapter 20, Emerging Contaminants your brain will drift away trough every dimension, wandering in each aspect that maybe mysterious for but surely can become your mind friends. Imaging each word written in a reserve then become one application form conclusion and explanation this maybe you never get ahead of. The Chapter 20, Emerging Contaminants giving you an additional experience more than blown away your brain but also giving you useful data for your better life within this era. So now let us explain to you the relaxing pattern at this point is your body and mind are going to be pleased when you are finished looking at it, like winning a. Do you want to try this extraordinary spending spare time activity?

Willie Bergeron:

In this time globalization it is important to someone to find information. The information will make a professional understand the condition of the world. The health of the world makes the information easier to share. You can find a lot of references to get information example: internet, magazine, book, and soon. You will observe that now, a lot of publisher this print many kinds of book. The book that recommended to you personally is Chapter 20, Emerging Contaminants this reserve consist a lot of the information on the condition of this world now. This kind of book was represented how can the world has grown up. The words styles that writer require to explain it is easy to understand. The particular writer made some exploration when he makes this book. This is why this book ideal all of you.
