## **Karst Hydrology: Concepts from the Mammoth Cave Area** W.B. White, E.L. White

This volume has its roots in the distant past of more than 20 years ago, the International Hydrologic Decade (IHD), 1964-1974. One of the stated goals of the IHD was to promote research into groundwater situations for which the state of knowledge was hopelessly inadequate. One of these problem areas was the hydrology of carbonate terrains. Position papers published early in the IHD emphasized the special problems of karst; carbonate terrains were supposed to receive a substantial amount of attention during the IHD. There were indeed many new contributions from European colleagues but, unfortunately, in the United States the good intentions were not backed up by much in the way of federal funding. Some good and interesting work was published, particularly by the U. S. Geological Survey (USGS), but in the academic community the subject languished. About this same time the Cave Research Foundation (CRF), organized in 1957 to promote the systematic exploration, survey, and scientific study of the great cave systems of Mammoth Cave National Park, was casting about for a broader scope for its research activities. Up until that time, CRF research had been largely restricted to detailed mineralogical and geological investigations within the caves, with the main part of the effort concentrated on exploration and survey. The decision to investigate the hydrology required a certain enlargement of vision because investigators then had to consider the entire karst drainage basin rather than isolated fragments of cave passage.

### **From reader reviews:**

#### **Georgianna Menendez:**

This Karst Hydrology: Concepts from the Mammoth Cave Area book is not really ordinary book, you have after that it the world is in your hands. The benefit you obtain by reading this book will be information inside this book incredible fresh, you will get details which is getting deeper an individual read a lot of information you will get. This particular Karst Hydrology: Concepts from the Mammoth Cave Area without we understand teach the one who looking at it become critical in pondering and analyzing. Don't become worry Karst Hydrology: Concepts from the Mammoth Cave Area can bring if you are and not make your carrier space or bookshelves' turn into full because you can have it with your lovely laptop even cell phone. This Karst Hydrology: Concepts from the Mammoth Cave Area having very good arrangement in word along with layout, so you will not truly feel uninterested in reading.

#### **Katrina Scofield:**

Now a day individuals who Living in the era just where everything reachable by interact with the internet and the resources inside can be true or not require people to be aware of each data they get. How individuals to be smart in receiving any information nowadays? Of course the reply is reading a book. Examining a book can help folks out of this uncertainty Information especially this Karst Hydrology: Concepts from the Mammoth Cave Area book since this book offers you rich information and knowledge. Of course the data in this book hundred pct guarantees there is no doubt in it you probably know this.

#### **Betty Bobbitt:**

As a scholar exactly feel bored to be able to reading. If their teacher asked them to go to the library or make summary for some guide, they are complained. Just little students that has reading's spirit or real their passion. They just do what the teacher want, like asked to go to the library. They go to at this time there but nothing reading very seriously. Any students feel that studying is not important, boring as well as can't see colorful pictures on there. Yeah, it is to get complicated. Book is very important for yourself. As we know that on this period, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. Therefore this Karst Hydrology: Concepts from the Mammoth Cave Area can make you sense more interested to read.

#### **Jennifer Chambers:**

What is your hobby? Have you heard that will question when you got learners? We believe that that problem was given by teacher to their students. Many kinds of hobby, Every person has different hobby. And you also know that little person just like reading or as reading become their hobby. You should know that reading is very important along with book as to be the point. Book is important thing to include you knowledge, except your own personal teacher or lecturer. You see good news or update about something by book. Amount types of books that can you take to be your object. One of them is Karst Hydrology: Concepts from the Mammoth

Cave Area.
