Everyone has read about history's most important people and events in dense textbooks and classrooms, but words can only say so much. In Charles River Editors' Interactive Biography series, history comes to life in video and audio, allowing people to not only read history but truly experience it, through the eyes and ears of the people who were there.

During the middle of the 20th century, the United States completed its transformation into one of the world's superpowers, and few were as instrumental in this development as Dwight D. Eisenhower (1890-1969). A career military man, Ike was too young to serve in combat during World War I, but he began a long and productive career collaborating with future military legends George Patton and Douglas MacArthur while serving some of the nation's other famous generals, including George Marshall and John J. Pershing. Amazingly, he had never served in anything but administrative positions before World War II.

By 1942, Eisenhower was given the role of appointed Supreme Commander Allied (Expeditionary) Force in

North Africa, and after his success there, Eisenhower oversaw the invasion of Sicily in 1943, which at the time had been the largest amphibious invasion in history. In both campaigns he had the fortune of commanding George Patton.

With those successes, President Roosevelt picked Eisenhower to be the Supreme Allied Commander of the Allied Expeditionary Force, leaving him in charge of Operation Overlord and the defining moment of his military career, D-Day.

By the time he died in 1969, President Nixon aptly described Eisenhower as “the world's most admired and respected man, truly the first citizen of the world.”

Rommel, Guderian, Liddell-Hart and JFC Fuller were all early exponents and practitioners of armored warfare, tactics that were to break the stalemate that had characterized World War I. Advocates of the tank and above all speed, it was their ideas which decimated Saddam Hussein's forces in the 1990 Gulf War. But among the proponents and practitioners of armored warfare, the brash, bold, arrogant and eccentric George S. Patton remains the world's greatest armored commander by the one yardstick that really counts: the battlefield. In 1944-45, Patton's Third Army raced across northern Europe, covering more ground and destroying more enemy resources than any other equivalent force in history.

Patton is one of America's most celebrated generals and one of the most famous generals of the 20th century,

but his story has its origins in the form of a shy, dyslexic boy who could cry uncontrollably and who viewed his own emotional intelligence as unmanly. Patton was a fascinating, complicated and controversial man whose life story ranges between genius, folly and tragedy, with absolute determination the one constant theme.

Between the two World Wars, he wrote at length about mechanized warfare and tactics, and during the Second World War he worked his way up colorfully, controversially, and capably, all of which made him more conspicuous during the war. Patton's shocking death just a few months after the war ended ensured that the general died at the height of his fame and would always be remembered for his legendary attitude and exploits.

This book profiles the lives, careers, friendship and legacies of the two legendary generals, along with videos and pictures, a bibliography and a Table of Contents.
