Biopunk: Solving Biotech's Biggest Problems in Kitchens and Garages Marcus Wohlsen

Bill Gates recently told Wired that if he were a teenager today, he would be hacking biology. "If you want to change the world in some big way," he says, "that's where you should start-biological molecules."

The most disruptive force on the planet resides in DNA. Biotech companies and academic researchers are just beginning to unlock the potential of piecing together life from scratch. Champions of synthetic biology believe that turning genetic code into Lego-like blocks to build never-before-seen organisms could solve the thorniest challenges in medicine, energy, and environmental protection. But as the hackers who cracked open the potential of the personal computer and the Internet proved, the most revolutionary discoveries often emerge from out-of-the-way places, forged by brilliant outsiders with few resources besides boundless energy and great ideas.

In *Biopunk*, Marcus Wohlsen chronicles a growing community of DIY scientists working outside the walls of corporations and universities who are committed to democratizing DNA the way the Internet did information. The "biohacking" movement, now in its early, heady days, aims to unleash an outbreak of genetically modified innovation by making the tools and techniques of biotechnology accessible to everyone. Borrowing their idealism from the worlds of open-source software, artisanal food, Internet startups, and the Peace Corps, biopunks are devoted advocates for open-sourcing the basic code of life. They believe in the power of individuals with access to DNA to solve the world's biggest problems.

You'll meet a new breed of hackers who aren't afraid to get their hands wet, from entrepreneurs who aim to bring DNA-based medical tools to the poorest of the poor to a curious tinkerer who believes a tub of yogurt and a jellyfish gene could protect the world's food supply. These biohackers include:

- A duo who started a cancer drug company in their kitchen
- A team who built an open-source DNA copy machine
- A woman who developed a genetic test in her apartment for a deadly disease that had stricken her family

Along with the potential of citizen science to bring about disruptive change, Wohlsen explores the risks of DIY bioterrorism, the possibility of genetic engineering experiments gone awry, and whether the ability to design life from scratch on a laptop might come sooner than we think.

From reader reviews:

Alan Johnson:

Have you spare time for any day? What do you do when you have far more or little spare time? Yes, you can choose the suitable activity intended for spend your time. Any person spent their very own spare time to take a walk, shopping, or went to the Mall. How about open or even read a book eligible Biopunk: Solving Biotech's Biggest Problems in Kitchens and Garages? Maybe it is being best activity for you. You recognize beside you can spend your time along with your favorite's book, you can more intelligent than before. Do you agree with the opinion or you have some other opinion?

Joann Hamilton:

Nowadays reading books become more and more than want or need but also turn into a life style. This reading addiction give you lot of advantages. Associate programs you got of course the knowledge the particular information inside the book in which improve your knowledge and information. The knowledge you get based on what kind of publication you read, if you want get more knowledge just go with schooling books but if you want sense happy read one along with theme for entertaining such as comic or novel. Typically the Biopunk: Solving Biotech's Biggest Problems in Kitchens and Garages is kind of publication which is giving the reader unstable experience.

Desiree Schwindt:

Reading can called mind hangout, why? Because when you are reading a book especially book entitled Biopunk: Solving Biotech's Biggest Problems in Kitchens and Garages your thoughts will drift away trough every dimension, wandering in every aspect that maybe unfamiliar for but surely can be your mind friends. Imaging just about every word written in a book then become one web form conclusion and explanation this maybe you never get previous to. The Biopunk: Solving Biotech's Biggest Problems in Kitchens and Garages giving you yet another experience more than blown away the mind but also giving you useful details for your better life within this era. So now let us present to you the relaxing pattern is your body and mind will be pleased when you are finished examining it, like winning a sport. Do you want to try this extraordinary wasting spare time activity?

Jacqueline Bull:

Are you kind of stressful person, only have 10 as well as 15 minute in your day time to upgrading your mind skill or thinking skill also analytical thinking? Then you are experiencing problem with the book than can satisfy your small amount of time to read it because all of this time you only find guide that need more time to be learn. Biopunk: Solving Biotech's Biggest Problems in Kitchens and Garages can be your answer because it can be read by a person who have those short time problems.
