**Nursing Children and Young People with ADHD** Noreen Ryan, Tim McDougall

ADHD is one of the most commonly diagnosed behavioural disorders in children and young people. It is a complex and contested condition, with potential causes and treatments in biological, psychological and social domains. This is the first comprehensive text for nurses and other health professionals in this field.

*Nursing Children and Young People with ADHD* explores the evidence, incorporating and expanding on the new NICE guidelines for practice in this area, to provide an essential knowledge base for practice. The text covers: causes, diagnosis, co-morbidity, user and carer perspectives, assessment, treatment and interventions (including those suitable for use in schools), prescribing and the legal background.

An invaluable text for pre-registration student nurses on mental health and children branches, this will also be a useful reference work for post-registration nurses and health professionals seeking evidence-based recommendations for practice.
